EXPERIENCE

South Carolina Department of Health and Human Services
Role: User Experience and Interface Design
August 2015 - January 2024 (FT)

Highlights: Redesigned Public Website, Enterprise Advanced Planning, Medicaid Enterprise Services, Accessibility Compliance

My role with SCDHHS marked my first time as a full-time government contractor. I was responsible for developing user personas, workflows, wire friends and rapid prototyping clickable mockups. I created application concepts for internal use and public-facing products based on user requirements and scenarios.

Also I was asked to monitor brand standards for adherence to established style guides and generating new standards for user interaction across multiple products and platforms. Lastly I was tasked with reviewing any projects for use by the public for adherence to accessibility compliance law.

Skills: UX design, HTML, CSS, JavaScript, Vue.js

Graybear LLC
Role: Web Designer and Web Developer, Owner
January 2011 - August 2015 (FT), January 2024 - Present (PT)

I use Graybear as my brand for accepting freelance projects. This can range from solo work to temporarily joining a larger team. I've worked with a variety of artists, agencies and development pipelines. In addition I have worked with small companies, enterprise level companies and government agencies both remotely and traveling for on-site work.

Skills: UX design, HTML, CSS, JavaScript, Vue.js

Featured Clients: Netflix, GoDaddy, Ford Motor Company, Sony Pictures, Paramount Pictures
Most Recent Clients: Chernoff Newman, The Bigger Design

The Iron Yard
Role: Instructor
January 2017 - June 2017 (PT)

Highlights: Teaching front-end web development to students with a secondary education and a variety of background skillsets.

The Iron Yard was a condensed, immersive course designed to prepare post high school graduates with little to no experience in web development for a career in the industry. Over twelve weeks I taught a full-time class in front-end web development consisting of the fundamentals of HTML, CSS and JavaScript the first half the semester and modern developer tools including SASS and ReactJS during the second half.

I taught at the school's Columbia, SC campus, with an additional two weeks guest lecturing at that The Iron Yard's location in Charleston, SC.

Skills: HTML, CSS, JavaScript, ReactJS

Cyberwoven
Role: Web Designer and Web Developer
May 2008 - December 2010

Highlights: Working with a 20 person team on designing, developing and maintaining a large number of websites for clients from a wide variety of industries.

My first full-time job in front-end web development came with the digital firm Cyberwoven immediately after I finished grad school. The firm was local to my hometown of Columbia, SC, and I was the agency's seventeenth hire. My day-to-day responsibilities focused on the front-end coding and designing of a variety websites around a proprietary Content Management System.

Skills: Web design, HTML, CSS, JavaScript

Featured Clients: University of South Carolina's Moore Business School, South Carolina Bank & Trust, North Carolina Bank & Trust, Zeus and the office building 1441 Main.
